

Winter Rates Return with November Billing

Pepco, like many other utilities, charges different rates for electricity use in the winter (November-May) than it does in summer (June-October). Energy costs are less in winter than summer because demand for electricity is lower in the winter. The following charts compare rates between winter and summer periods for several different residential rate schedule categories. The change to winter rates will begin with the billing month of November 2006. Your rate schedule appears in the "Meter Summary" portion of your bill.

Customers who receive Pepco's Standard Offer Service (SOS) are subject to the Distribution, Transmission and Generation Service charges below. These charges reflect revisions in SOS (generation) rates that took effect June 1, 2006. Customers who have selected an alternative electricity supplier are subject only to the Distribution Service charges below, modified as appropriate by the application of the Billing Credit.

RATE SCHEDULE	WINTER Billing Months November-May	SUMMER Billing Months June-October
RESIDENTIAL "R" – available to single-family homes, individually metered units in multi-family buildings and to many master-metered apartments.		

Distribution Service Charges

Generation Service Charges

On Peak Kilowatt-hour Charge	7.895¢ per kwhr	9.513¢ per kwhr
Intermediate Kilowatt-hour Charge	7.609¢ per kwhr	8.016¢ per kwhr
Off Peak Kilowatt-hour Charge	6.883¢ per kwhr	7.085¢ per kwhr
Procurement Cost Adjustment**		

*Subject to change periodically.

** Rate changes monthly. See www.pepco.com.

Billing Credit - A monthly billing credit in the amount of \$0.62 will be applied to the bill of each customer receiving a consolidated bill from an alternative supplier for services provided both by Pepco and by the alternative supplier.

Minimum Charge = the customer charge

For customers on "R-TM" and "R-TM-EX" rate schedules, the off-peak rates are the least expensive.
