

## New Rates for Maryland Standard Offer Service Customers

Pepco's Standard Offer Service (SOS) supply rates for Maryland residential customers will decrease June 1, 2011. If you have not chosen an alternative electricity supplier, you are on Standard Offer Service and Pepco buys electricity for you.

For residential customers, the new supply rates will decrease the total annual bill by about 15 percent. For a typical residential customer who uses about 1,000 kilowatt-hours (kWh) of electricity a month, this will result in a monthly decrease of about \$21.16 from about \$145.33 to \$124.17 on the total bill.

The proposed new rates are based on market prices obtained through a competitive bidding process overseen by the Maryland Public Service Commission. This year's supply auction replaced some older, higher-priced supply contracts, resulting in lower prices for customers.
