

# New Distribution Rates Took Effect March 23, 2010; New Standard Offer Service Rates Take Effect June 1, 2010; Summer Rates Return with June Billing

## NEW DISTRIBUTION RATES

The District of Columbia Public Service Commission has approved an increase in Pepco's distribution rates effective with service on and after March 23, 2010. The increase reflects rising costs to provide customers with reliable electric service including improvements to the electric system, inflation and the higher cost of capital.

## NEW SOS RATES

The increase in distribution rates will be offset by a decrease in Pepco's Standard Office Service (SOS) that take effect June 1, 2010. If you have not chosen an alternative supplier, you are on Standard Office Service and Pepco buys electricity for you, charging you rates approved by the Public Service Commission.

New SOS rates are based on market prices obtained through a competitive bidding process and reflect lower fuel costs to produce electricity. Visit [pepco.com](http://pepco.com) and check out the District of Columbia Customer Choice section of our site to learn more about SOS rates. Our Web site also offers conservation ideas which help customers to better manage their energy costs.

## RESIDENTIAL CUSTOMERS

Distribution rates increased with service on and after March 23, 2010. The overall impact to the average winter monthly bill (from March 23, 2010 through May 31, 2010) for the typical residential customer who uses 750 kilowatt-hours per month will increase 2.1 percent or \$2.15.

SOS rates for summer and winter will decrease with service on and after June 1, 2010. The combined effect of the distribution rate increase described above and the SOS rate decrease will increase the average monthly bill for the typical residential customer who uses 750 kilowatt-hours per month by less than 1 percent or \$0.86.

## RESIDENTIAL AID DISCOUNT CUSTOMERS - RAD

Distribution rates increased with service on and after March 23, 2010. The overall impact to the average winter monthly bill (from March 23, 2010 through May 31, 2010) for the typical RAD customer who uses 750 kilowatt-hours per month will increase 1.9 percent or \$1.44.

SOS rates for summer and winter will decrease with service on and after June 1, 2010. The combined effect of the distribution rate increase described above and the SOS rate decrease will increase the average monthly bill for the typical RAD customer who uses 750 kilowatt-hours per month by less than 1 percent or \$0.73.

Listed in the chart below are the new Distribution Service Charges and new summer Standard Offer Service rates including a comparison on summer and winter rates. Please note that summer rates take effect with the billing month of June and reflect higher energy costs to meet the demand for electricity. Customers who have selected an alternative electricity supplier are subject only to the Distribution Service charges below modified as appropriate by the application of the Billing Credit.

To help current SOS customers evaluate offered from alternative suppliers, your bill contains the "price to compare" for "Generation and Transmission Services."

RATE SCHEDULE	<b>Summer Billing Months</b>	<b>Winter Billing Months</b>
