

Find More Ways to Save.

Go online to manage your energy costs with easy resources everyone can use.

- Tips and programs for saving money and energy
- Online tools to look closer at your energy use
- Budget billing plans and more

An Exelon Company

Today our District of Columbia customers have more ways than ever to save on energy costs. Visit pepco.com/everyonesaves and you can:

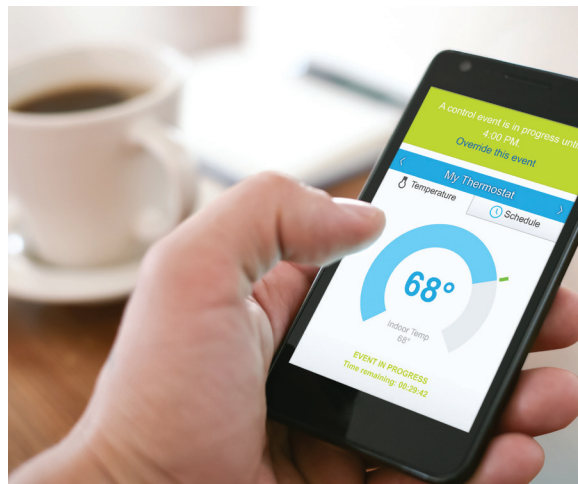

Find tips for saving. Small changes can make a big difference in your energy bill, and we have tips for every season. In winter months, for example, you can save about 3% on heating costs for every degree under 70° F that you set your home thermostat. Set it to 68° F during the day and 60° F at night, and savings really add up.

- Save up to 10% on heating when you seal leaky ductwork with silver metal duct tape
- Save about \$50 per year by washing clothes in cold water instead of hot
- Or save up to 70-90% on lighting year-round when you replace standard bulbs with energy-efficient LED and CFL bulbs

You can even explore fun activities that teach kids how to save energy at home. With simple tips such as turning off lights after leaving a room, or unplugging laptop chargers when charging is complete, everyone can help reduce energy use.

Take control of your energy use. Sign up for My Account on our website or download the free Pepco mobile app. You'll have access to tools that let you take a closer look at how much energy you're using – and how much you can save:

- Analyze and compare bills from month to month
- See where your dollar goes
- Get practical tips for saving
- Use calculators to explore the value of making upgrades

Make your energy bill predictable. Use our Budget Billing program to avoid seasonal peaks in your electric bills and pay the same amount each month.

We also offer special payment arrangements, assistance programs and more. Call 202-833-7500 for details.
