

Give your A/C a **break** **this summer**

EXPLORE TIPS FOR SAVING
ENERGY & MONEY ►

Unplug and Save This Summer

Save energy and money on Peak Savings Days with Pepco by following these tips:

- Reduce your A/C use, just a few degrees makes a difference
- Fire up the outdoor grill instead of cooking inside
- Turn off lights and electronics if you're not using them
- Close the shades or blinds to help keep your house cool
- Do high energy chores, like laundry and the dishes, before or after specified hours

What are Peak Savings Days? They're a few days each summer when energy demand is high. You can earn bill credits by using less energy during peak hours — usually a couple of hours between noon and 8 p.m. We'll notify you the night before a Peak Savings Day by phone, text or email.

You can also save with Energy Wise Rewards™ (EWR) by making your savings automatic.* Get an alert that tells you how much you saved and how your savings compare to others by logging in to My Account.

To learn more about how to save while reducing your energy use, visit pepco.com/Peak or call 1-855-730-PEAK (7325).

* If you are enrolled in EWR, you will receive the greater of the EWR monthly credit or the Peak Energy Savings credit.
