- Large, easy-to-read display with 7-day or weekday/weekend schedule options
- Receive Peak Savings Day alerts

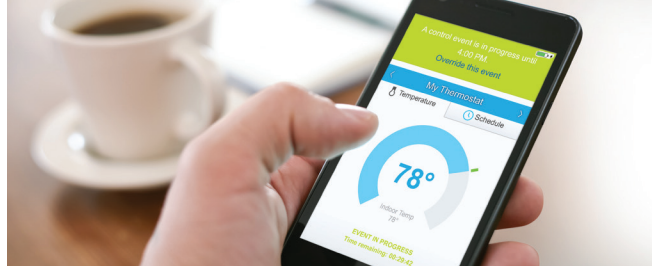

An Exelon Company

Control Your Home's Temperature – Anytime, Anywhere

Now you can check and adjust temperatures from your smartphone, or anywhere you can access the Internet. It's easy with the Wi-Fi® web-programmable thermostat. Plus, you'll be able to save *automatically* on your summer bills with Energy Wise Rewards™.

Available to Pepco customers in Maryland with:

- Central air conditioning or a heat pump
- Home Wi-Fi network

Controlling Your Home's Comfort and Efficiency Has Never Been Easier

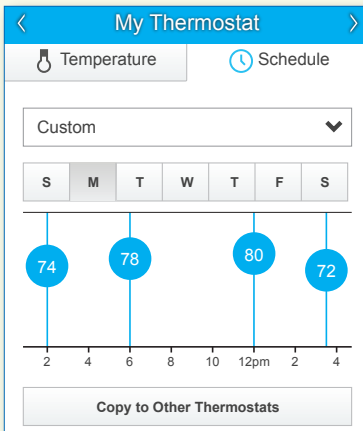

- Remote control and monitoring via smartphone, computer or tablet
- Convenient programmable settings
- Professionally installed and connected to your home's Wi-Fi network

Here's how it works:

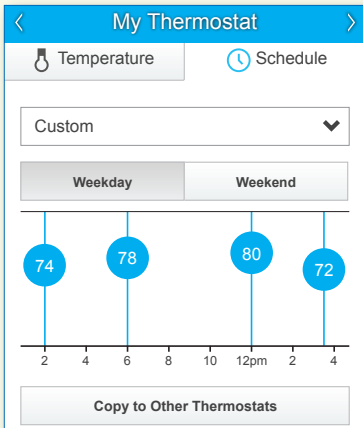

Participate in Energy Wise Rewards and a trained technician will professionally install, program and connect the Wi-Fi web-programmable thermostat to your home's Wi-Fi network at no charge. They'll also show you how to access and adjust the thermostat via your smartphone, computer or tablet. After installation, you'll receive credits off your electricity bills.

If you don't have Wi-Fi at home, we have other thermostat upgrades that may suit your needs. Just contact us to learn more.

Make temporary changes when leaving home for longer periods of time without reprogramming your settings.

Use the Pepco mobile app to program and adjust temperature settings for each day of the week.

Scheduling options make it easy to repeat settings for weekdays and weekends.

All of your thermostats will be set to

85° 

and remain until you remove it

Or, tell us when to remove it

Date
Saturday July 16, 2016
