ELIGIBILITY

The PIV charging rate is open to qualified residential customers and requires the installation of a second AMI meter at the residence and a home inspection prior to approval. This rate applies to one EVSE per residence only.

I do not have an EVSE. If I qualify, I want to apply for a 50% discount on a Level 2 EVSE and the installation. I understand that I am responsible for paying 50% of the EVSE cost, and 50% of the cost of the EVSE installation, which will be paid directly to the installer on the day of installation.

I am interested in the optional Green Rider (R-PIV Green), which provides 100% renewable energy and will be applied to billed kilowatt hours.

I own/lease/operate plug-in vehicle registered in Maryland. I don't already have EVSE at the service property.
